

YOUR NEW HOME ON THE WATER

WWW.DERUBISYACHTS.EU

If not now, when?

Many of us spend our lives pursuing careers, running successful businesses, and raising our families. Now is the time to enjoy the fruits of your labor. You've planned for the day when you'll embark on your next great adventure. Today is that day. Let Derubis Yachts assist you with the planning and implementation of that next adventure.

ABOUT DERUBIS 44 FLY

*More than a Yacht.
A second Home.*

We managed to create a high performance, high-luxury boat with 4 double cabins and 4 bathrooms with an incredible design.

A lot of living space with 18 m² saloon, 20 m², flybridge, 8 m² aft deck, panoramic windows with spectacular 360-degree views.

There is a choice of relaxation and entertaining onboard with whirlpool for 6 persons on the sundeck.

MULTIHULL

Excellent Stability

Derubis 44 fly semi-displacement hulls are built to deliver stability in all sea conditions.

Massive flybridge with lounges and dining table gives you truly relaxing cruising experience.

Derubis 44 fly has a revolutionary accommodation design that can accommodate 8 + 2 persons.

One of the major advantages of our catamarans versus a monohull is their inherent stability.

MULTIHULL

Massive flybridge

A monohull simply can't be compared to a catamaran in this regard. Stability is a big plus for families with young children or seniors who are not particularly steady on their feet. Because the boat is not as susceptible to the effects of wave action and does not heel the way a monohull does, it is much easier to walk around on deck and within the interior of the yacht while underway.

RELAXED FUN

Treasured vacation

The added stability on a catamaran makes the cook's job a lot less challenging both while underway and at anchor.

Catamarans generally provide far more living space in the main salon, galley and cockpit, than the space found aboard similarly priced monohulls.

Our cabins are more spacious too with stand-up headroom in each cabin.

Because of the layout, there is usually more privacy on a catamaran than on a monohull, and if you have children aboard, there is greater separation from the main living space and the cabins, making it easier for the kids to fall asleep at a reasonable hour.

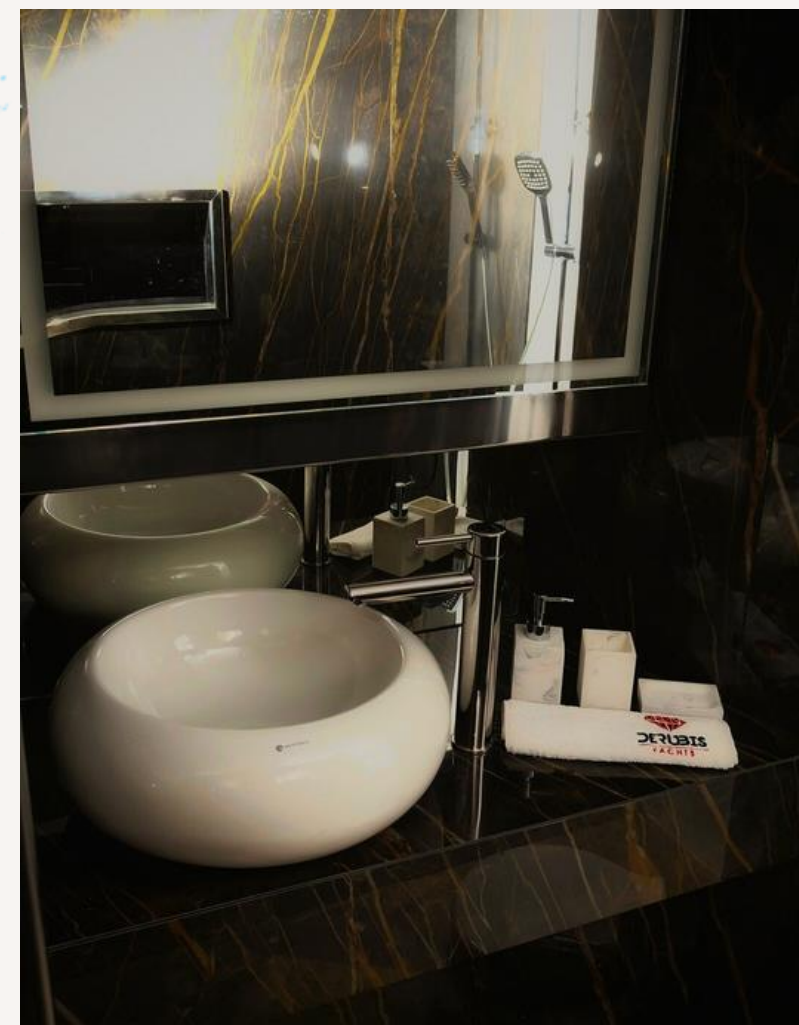

RELAXED FUN

Treasured vacation

The shallow draft of a catamarans allows you to anchor in shallower water which means you can be closer to the beach than almost all monohulls.

No monohull can beat the visibility from the helm provided on catamarans.

The galley, main salon and cockpit are all on one level, above the water line, making life aboard as well as your view much more enjoyable.

DERUBIS 44 FLY

*Dive into the Future of
Power Catamarans*

Our team is dedicated to pushing the
boundaries of design and performance in
every catamaran we create.
